

SealSmart EX

**FOR
TUBELESS READY/
TUBLESS TIRE
Sealant**

Instruction

- Please read the operating instructions carefully to use the product correctly and safely.
- Ensure that you read the "Safety Precautions" before use.

Before use

- This product is a sealant especially designed for bicycle tires (tubeless compatible/tubeless/tubeless ready). Do not use the product for any other purpose.
- Approximate amount to use (for one tire)
 - Road : About 60~90ml
 - CYCO CROSS/GRAVEL : About 90~120ml
 - MTB(26"/27.5") : About 90~120ml
 - MTB(29") : About 120~150ml
- Product specifications are subject to change without notice.
- If you have any questions about handling the product or the like, please contact us using the contact form on our website.
- It can seal up to 6mm holes punctured by foreign objects.
- Read the tire manual for tire installation instructions.
- Do not use this product with any other puncture repair products.
- Use the product outdoors or in a well-ventilated area. Wear a disposable mask, protective gloves, and a vest, if necessary.

Request

- If the product is to be used by children or people who are not used to handling it, a parent, guardian, or someone who is familiar with handling it should be nearby and should not allow a child or someone not familiar with the product to use the product by themselves.
- If you think there is something wrong during use, discontinue use immediately.
- The duration of effectiveness depends on the environment in which the product is used.
- When storing the product, seal the container and keep it away from stoves and other heat sources, rain, direct sunlight, oil, organic solvents, and so on.
- Please follow your local rules when disposing of the product.

Safety Precautions (Always observe these precautions)

⚠ CAUTION

! Work outdoors or in a well-ventilated area

If you inhale vapours and feel unwell, consult a doctor immediately.

! Avoid contact with skin

If the product comes into contact with your skin, rinse thoroughly with water and consult a doctor immediately if any unusual effects persist.

⊘ Do not put the product in your eyes or mouth, or swallow the product

Blindness may occur if the product comes into contact with your eyes. The product can be harmful to the body if accidentally swallowed.

⊘ Keep out of reach of children

Not doing so may cause injury.

Using the Product

Shake the product well before use.

When injecting directly from the Valve

- 1 Install the tire completely on the bicycle rim

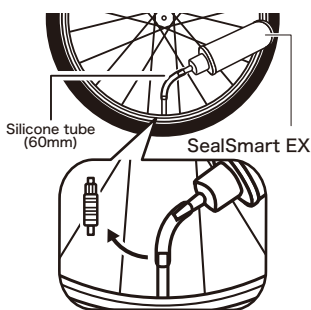

- 2 Remove the valve core

Follow the instruction of the valve or the wheel to remove the valve core.

- 3 Inject sealant into the valve

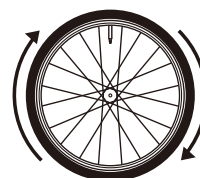

Inject sealant directly into the valve.

※The silicone tube does not come with 500ml 1000ml packages only with 120ml.

- 4 Rotate the wheel

Rotate the tire while lowering the tire backwards and forwards, left and right, so that the entire circumference of the tire is covered.

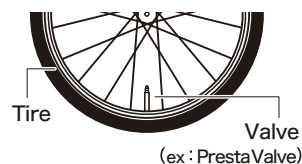

- 5 Inflate the tire

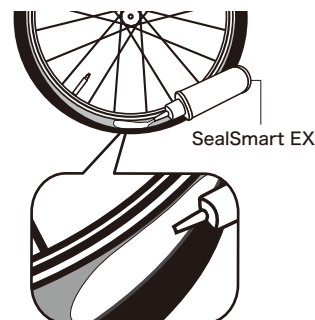

The tire's air pressure should be in accordance with the standard (recommended) air pressure indicated on the tires and other equipment.

When injecting into the tire

- 1 Install the tire on the bicycle rim, leaving the valve in Place

- 2 Injecting sealant into tire

- 3 Fully fit the tires

Others
